SANFORD
HEALTH

SANFORD
HEALTH

YOU'VE DECIDED TO BECOME A PHYSICIAN.

Your reasons for choosing this career could have a variety of influences—possibly your mother, father, another member of your family, or your own employment at Sanford Health.

Because of this, you already have a strong tie to Sanford Health.

We want your connection to our Sanford family to grow even deeper as you pursue your career as a physician.

Learn from the best

Sanford Sons & Daughters is here to give participants the opportunity to learn from some of the region's most innovative minds in health care today.

The Sons & Daughters program is available to students who are pursuing a career as a physician and who have been accepted into medical school, or at any time during training in medical school, residency, or fellowship.

We will provide participants with informational resources and mentorship opportunities through this program. Participants will have the opportunity to be paired with a current Sanford physician or researcher for personal guidance. Participants can also explore career possibilities and evaluate options for specialty training and research within Sanford's health care system.

Gain an advantage

There are multiple parts to this program:

- **Career and specialty guidance:** Participants can explore specialties, specific areas of projected physician need, and research opportunities within Sanford.
- **Mentorship:** Participants will have the opportunity to be paired with a current Sanford physician and/or researcher who will function as their mentor.
- **Financial support:** Sanford shares your excitement regarding the achievement of being accepted into medical school. Students accepted into medical school or who are in physician training will be eligible for a \$1,000 acceptance scholarship from Sanford.

Sanford may also provide financial support to students during their medical training years, which includes medical school, residency and fellowship training. We offer an ongoing Sons and Daughters Scholar Loan opportunity to assist with educational and living expenses. Eligible candidates must express an interest in pursuing a career at Sanford.

- **Other opportunities:**

Participants will have access to a consultant who specializes in the Public Service Loan Forgiveness Program. The consultant will suggest options to organize and better manage student loans enabling access to federal programs that may decrease a significant portion of student debt.

Participants have the opportunity to attend the annual Sanford Scholar Social, the annual Sanford Physician Recognition Banquet, and other Sanford hosted events in order to connect with physicians and staff.

There's no place like home

Sanford wants to provide a meaningful learning experience for participants during training. This will help prepare participants to provide the best care possible to their patients.

Those participating in Sanford Sons & Daughters will have a place within our family.

The program provides participants with the opportunity to begin their career with our world-class health care organization, but in a comfortable environment close to the support network of family and friends.

"We want to reach out to the family members of our Sanford family first when identifying future, talented physician candidates.

We feel they share the values, work ethic and passion of our Sanford family, which includes our commitment to the work of health and healing. This is one of our organization's greatest strengths."
